

ART107

## HTML text formatting / Hypertext

This is a short assignment, intended to introduce you to HTML syntax and the process of uploading your pages.

For this assignment, you will need to transfer a work of text from its printed form to the web. You can choose whatever text you want from whatever source you want. You should cite your source at the bottom of the page.

Your page must be 500 words long.  
It must contain the following HTML elements:

```
<title>  
<h1>  
<h2>  
<p>
```

Your text must be spaced in a visually pleasing way.

Of the 500 words, 25 must be linked to other pages.

After coding your page, save it as a .html document and place it in a folder called:

assignment\_1

We will demo uploading your webpage to your server accounts during class.
